

## Meeting Agenda

Date: 03/04- 2017

Chair: Erik Magnusson

Participants: Peter Gärdenäs, Erik Magnusson, John Segerstedt, Jonathan Gildevall

### 1. Objectives

No issues so far as we hadn't assigned any tasks.

### 2. Reports

- Peter has: Tried to send requests from android, managed to do it with regular Java but not in android.
- Erik has: Tried to combine a listview with a detailed swipeable view.
- John has: Attempted to learn how to add activities within navigation.
- Jonathan has: Looked at how to build views.

### 3. Discussion items

- Domain modal presentation → Accommodation fine name, Add "own" numbers and maybe fancy arrows, WatchList should be renamed, make more UML like designwise? -Colors of boxes etc
- Something to show on thursday → GUI without backend.
- Do we want favorites to disappear? → Settings

### 4. Outcomes and assignments

- GUI Components
