

Meeting Agenda

Date: 09/05 - 17

Chair: Jonathan Gildevall

Participants: Peter Gärdenäs, Erik Magnusson, John Segerstedt, Jonathan Gildevall

1. Objectives

2. Reports

- Peter has:
 - Refactored favorites
 - Refactored MainModel, removed a lot of code
 - Rebuilt the update function, it now updates at set times
- Erik has:
 - Refactored Advanced search, might be a few things left
 - Started to look at test, realizing it might take some time
- John has:
 - Created SearchHandler that holds the searching logic and the list of last searches.
 - Implemented and linked the simple search
- Jonathan has:
 - Built the apply functionality for SGS
 - Some pieces remain from webView implementation incase we decide to use it anyway
 - Built settings page placeholder
 - Looked into testing and built some simpler tests
 - Small bug fixes, favorites not functioning properly and similarly

3. Discussion items

- Ask about tests
- Erik wants someone else to take a look at the Advanced Search refactoring before John starts to implement advanced searching.
- SDD will be started on before thursday. Assignments have been given out.
- Double dependencies from activitys??

4. Outcomes and assignments

- Peter will: check if "Number of searchers" from Chalmers is worth getting
- Erik will: SearchWatcher implementation,
- John will: implement advanced searches
- Jonathan will: Finish the apply procedure for Chalmers studentbostäder, create list handler for the recyclerView to reduce duplicated code. Try to extract bottom navigation
- Everyone will also work on their part in the SDD.

5. Wrap up

- Next meeting Thursday at 13.
