Meeting Agenda

Date: 24/04-2017

Chair: John Segerstedt

Participants: Peter Gärdenäs, Erik Magnusson, John Segerstedt

1. Objectives
   - Nope

2. Reports
   - Peter has: Refactor some parts of the project into MVC. Fixed the fetching and parsing of data from SGS. Done the image handling.
   - Erik has: Done the advanced search view. Fixed general bugs.
   - John has: Implemented first iteration of the favorite functionality. Created search objects and the ability to create and later display them in the bevakning view.
   - Jonathan has: Not here, has worked with swiping to add/remove accommodations.

3. Discussion items
   - Chalmers → will be releasing more accommodations tomorrow.
   - MVC → Should do, we have questions ready for thursday
   - Tests → Should do after we after MVC.
   - Search → The MainModel should hold a SearchHandler that holds Searches. The list of latest Searches should be held in the SearchHandler,
   - SearchWatcher → includes a Search object but also has a Name and a List of seen accommodations.

4. Outcomes and assignments
Wait until after the thursday meeting. We will focus on the web analysis for now.

5. Wrap up
Next meeting will be after the thursday meeting. Probably friday morning.
