Meeting Agenda

Date: 19/05 - 17

Chair: Erik Magnusson

Participants: Peter Gärdenäs, Erik Magnusson, John Segerstedt, Jonathan Gildevall

1. Objectives

2. Reports
   - Peter has: Refactored all over to break circular dependencies.
   - Erik has:
     - Added functionality to create SearchWatchers from the SearchWatcher view with a modal
     - Fixed a weird bug where the SearchWatcher list repeated itself
     - Refactored various activities, broke out functionality from Modals to make it more modular
     - Started working on a modal for editing searchWatchers
     - Small bug fixes
   - John has:
     - Fixed advanced search navigation related crash
     - Removed Region.SOUTH as it is not implemented by SGS
     - Empty search now results in all accommodations, also works in Simple Search
     - Redesigned the Advanced Search .xml
     - Added daysUpploaded and daysLeft and needed logic, search holds ints(days since) and accommodations holds strings (dates)
     - Continued working on the essay
   - Jonathan has:
     - Implemented the first basic iteration of sort
     - started to create settings and making it MVC
     - Made some changes to the object activity, not really satisfied with it yet

3. Discussion items
   - Chalmer keeps their dates on their object page
     - low prio
   - SGS keeps their regions stored as ints
     - low prio
   - We have bugs in desktop but not on mobile, and vice versa
     - Address in readme
     - Low prio to fix
   - Settings
     - Low prio, keep current
   - Default sorting + sorting self resetting
     - Will have default then use the previously selected

Essay, SDD, SW acco

4. Outcomes and assignments
- Peter will: Refactoring
- Erik will: SW edit, SDD
- John will: Tests
- Jonathan will: Refactoring

5. Wrap up
- Next meeting 22/05-2017 at 10:00-11:00
