Meeting Agenda

Date: 27/03 - 2017

Chair: John Segerstedt

Participants: Peter Gärdenäs, Erik Magnusson, John Segerstedt, Jonathan Gildevall

1. Objectives
- No obstacles so far as a result of just starting up.

2. Reports
- No previous protocol meeting.
- Last meeting we decided on that everyone was going to download android studios and getting virtual android machines to run an application. This has been achieved.

3. Discussion items
- Decide phone for VM   → Application should work for all reasonable resolutions
- Choose API   → We chose KitKat
- Discuss our domain model → Allocate this task after relevant lecture tomorrow
- Structure our git   → Will do, create folders.
- Edit language (UTF-8) and name on git → Everyone fixed it with git gui.
- Create a readme-file regarding launching the application → Created github issue.
- Create more and more detailed balsamiq mockups
- Use case →
        ● Basic Search
        ● Advanced Search
        ● Select Object
        ● Swipe Between Objects
        ● Create a "bevakning"
        ● Apply for contract
        ● Navigate through main views
        ● Add as favourite
        ● Get a "bevakning" notification
        ● Edit "bevakningar"
        ● Go through "Bevakningar"
- Prototyping → Will create UML, then start.
- RAD → Find out when it should be ready. Work on it today anyway.

4. Outcomes and assignments
    - Create use case UML → Peter
    - Write use cases   → John
    - Write introduction   → Jonathan
    - Create GUI →
            - Search →   Erik
            - Display single item → Jonathan

- "Bevakningar" → Peter
- Favourites→ Erik

- Functional requirements → Jonathan
- Non-functional requirements → Erik

5. Wrap up
- Structure our git
- Domain model → Do on thursday
- Prototyping
- Next protocol meeting thursday 8:00-11:00
